Alliance FX Capital, Ltd. Offers Work Experience Opportunities for Fresh Talent

Alliance FX Capital, Ltd., is today pleased to welcome its latest summer work experience students. The business has been offering opportunities to local students to gain an insight into all areas of the financial services company.

Alliance FX Capital, Ltd. launched the initiative earlier this last spring of 2016 by taking on several students that attend schools in our primary local market of Singapore; as well as finalizing plans to look to schools in Malaysia and Indonesia. Local and regional schools have participated in this type of intern programs of various businesses throughout the region.

Supported by the Universities, AFXC is proud to be a part of this participating group of business mentors.

Each student is given the opportunity to learn more about sectors of the business including Investment Management, Investment Operations, Finance, HR, and Marketing as well as within our primary product areas of Small-Cap Investing, Trading and Forex. Most of our student interns had never heard of the terms: Forex or Small-Cap equities or even IPOs or Pre-IPOs. Our "Trading Desk" has been an especially interesting draw for all of the interns.

Rayzal Khadijah, currently a senior at University here in Singapore, studying Economics, will eventually work in finance. He had visited the company's headquarters this past spring in order to gain experience in the Investment Management arm of the business.

Rayzal says: "Alliance (AFXC) has a very professional team, and it has been a challenging yet rewarding and interesting experience."

Rayzal was assigned in analyzing company fundamentals and examining cash flow and profit and loss statements. He also had the opportunity to try out one of the Bloomberg terminal on the AFXC Trading Desk.

Rayzal continued by saying, "It's been a really eye-opening experience, especially the Trading Desk. Wow, I never expected that finance could be this exciting. What action!"

He also observed, "I've been really surprised at how much work is fitted in to one day at the company. The experience has been really helpful as my ambition is to continue with Graduate studies and work in this field."

Joanne Manis, Managing Director, of HR, comments: "We warmly welcome students to gain work experience in the business, in all areas from analysing the day-to-day work of our marketing team, to the purchase of stocks and shares by our investment arm. In an increasingly competitive job market, we like to think we help the local community by offering students the opportunity to see into the working world of finance and fast-paced transactions".

In fact, AFXC has just offered a position to a graduating senior (a previous AFXC intern) with a degree in Computer Science as the company now is expanding our talent pool within our IT division.

AFXC is looking forward to welcoming and mentoring more students in the near future.
